- (10) Explain equal volumes of gases at the same pressure and temperature containing equal numbers of molecules in terms of equations.

= (10) Prove  $P_1 V_1^\delta = P_2 V_2^\delta$  by making use of the ideal gas

relationship  $\gamma = C_{p,m} / C_{v,m}$ ,  $C_p$  = heat capacity at constant pressure  
 $C_v$  = heat capacity at constant volume
